---

THE BAD NEWS
Correctly Incorrectly
73% of child restraints are used incorrectly
84% of infant seats 
84% forward-facing convertible seats
82% of forward-facing only seats

1 out of 5 booster-age children are unrestrained

THE GOOD NEWS
Child safety seats can reduce fatalities by

71% for infants NHTSA 2013
54% for toddlers NHTSA 2013

Belt-positioning booster seats lower the risk of injury to children aged 4-8 years by 45% compared with the use of seat belts alone
